Element Performance Inspection (EPI) Data Collection Tool 1.3.21 Parts Pooling (AW)

ELEMENT SUMMARY INFORMATION

Purpose of this Element (certificate holder's responsibility):

 To administer the Parts Pool Agreements by ensuring that parts pooling activities are conducted as specified in the certificate holder's manual and operation specifications paragraph D081.

Objective (FAA oversight):

- To determine the effectiveness of the certificate holder s procedures in meeting the desired output of the process.
- To determine if the certificate holder follows its procedures, controls, process measurements, and interfaces for the Parts Pooling process.
- To determine if there were any changes in the personnel identified by the certificate holder as having responsibility and/or authority for the Parts Pooling process.

Specific Instructions:

 To accomplish this EPI, the inspector should familiarize himself/herself with the certificate holder's approved Parts Pooling process.

EPI SECTION 1 - PERFORMANCE OBSERVABLES

Objective: The tasks and questions in this section of the data collection tool (DCT) are designed to assist the inspector in determining if the certificate holder follows its written procedures and controls and meets the established performance measures of the process. To accomplish this, questions have been generated to test both the outputs of the process as well as the process itself. Question 1 and its following subquestions are directed at the output(s) of the process, whereas questions 2-6, when answered, should be directed at the process itself.

	· · · · · · · · · · · · · · · · · · ·		
Tasi	Tasks		
	To meet this objective, the inspector must accomplish the following tasks:		
1.	Review the information listed in the Supplemental Information section of this DCT.		
2.	Review the policies, procedures, instructions, and information for the Parts Pooling process contained in the certificate holder's manual.		
3.	Review the last accomplished associated safety attribute inspection (SAI) for this element with emphasis on the controls, process measurements, and interface attribute section responses.		
4.	Observe the Parts Pooling process to gain an understanding of the procedures, instructions, and information contained in the certificate holder's manual.		
5.	Discuss the Parts Pooling process with the personnel (other than management) who perform the duties and responsibilities required by the process.		

Ques	Questions		
	To meet this objective, the inspector must answer the following questions:		
1.	Determine whether the following performance measures were met:		
1.1.	Was training provided to personnel performing the Parts Pooling process?	Yes No, Explain	
1.2.	Were only Parts Pooling participants listed in paragraph D081 of the certificate holder's operations specifications used to provide parts to the certificate holder? Related Performance JTIs: 1. Check at the air carrier specified location that records show that only	☐ Yes ☐ No, Explain	
	FAR Part 121 operators listed on the Parts Pool Agreement Authorization applies only to FAR Part 121 operators operating outside the U.S. in accordance with the Certificate Holder's design. Sources: 121.135(a)(1); FAA Order 8300.10, Volume 2, Chapter 87, Section 1, Paragraph 7 B (2).		
1.3.	Did all parts provided by a Parts Pooling participant and used by the certificate holder comply with the applicable provisions of the Federal Aviation Regulations and the certificate holder's manual? Related Performance JTIs:	Yes No, Explain	
	1. Check at the air carrier specified location that records show that the return to service of airframe components, powerplants, appliances, and spare parts that have been maintained, altered, or inspected by persons employed outside the United States who do not hold U.S. airman certificates was in accordance with the Certificate Holder's design. Sources: 121.135(a)(1); 121.361(b)		
	2. Check at the air carrier specified location that records show that the use		

		of airframe components, powerplants, appliances, and spare parts that have been maintained by persons employed outside the United States who do not hold U.S. airman certificates had been returned to service in accordance with the Certificate Holder's design. Sources: 121.135(a)(1); 121.361(b); 121.379(b)	
	3.	Check at the air carrier specified location that records show that the use of airframe components, powerplants, appliances, and spare parts that have been altered by persons employed outside the United States who do not hold U.S. airman certificates had been returned to service in accordance with the Certificate Holder's design. Sources: 121.135(a)(1); 121.361(b); 121.379(b)	
	4.	Check at the air carrier specified location that records show that the use of airframe components, powerplants, appliances, and spare parts that have been inspected by persons employed outside the United States who do not hold U.S. airman certificates had been returned to service in accordance with the Certificate Holder's design. EPI SECTION 2 - MANAGEMENT RESPONSIBILITY & AUTHORITY OBSERVABLES

Objective: The questions in this section address the responsibility and authority of the process. They are designed to assist the inspector in determining if there is a clearly identifiable, qualified, and knowledgeable person who is responsible for the process, is answerable for the quality of the process, and has the authority to establish and modify the process. (The person with the authority may or may not be the person with the responsibility.)

person with the responsibility.)			
Task	Tasks		
	To meet this objective, the inspector must accomplish the following tasks:		
	NOTE: If no personnel or major program changes (as defined by the principal inspector (PI)) affecting the responsibility or authority attributes for this element have occurred since the last SAI and/or EPI was accomplished, then do not perform tasks 3-6, below. Answer questions 1 and 2, below, and provide the name/title.		
1.	Identify the person who has overall responsibility for the Parts Pooling process.		
2.	Identify the person who has overall authority for the Parts Pooling process.		
3.	Review the duties and responsibilities for the person(s) who manage the Parts Pooling process documented in the certificate holder's manual.		
4.	Review the appropriate organizational chart.		
5.	Discuss the Parts Pooling process with the management personnel identified in tasks 1 and 2.		
6.	Evaluate the qualifications and work experience of the management personnel identified in tasks 1 and 2.		

Questions		
	To meet this objective, the inspector must answer the following questions:	
1.	Is there a clearly identified person who is responsible for the quality of the Parts Pooling process?	Yes No, Explain Name/Title:
2.	Is there a clearly identified person who has authority to establish and modify the certificate holder's policies, procedures, instructions, and information for the Parts Pooling process?	Yes No, Explain Name/Title:
3.	Does the responsible person know that he/she has responsibility for the Parts Pooling process?	Yes No, Explain No Change
4.	Does the person with authority know that he/she has authority for the Parts Pooling process?	Yes No, Explain No Change
5.	Does the person with responsibility for the Parts Pooling process meet the qualification standards?	Yes No, Explain No Change
6.	Does the person with authority to establish and modify the Parts Pooling process meet the qualification standards?	Yes No, Explain No Change
7.	Does the person with responsibility understand the controls, process	Yes

	measurements, and interfaces associated with the Parts Pooling process?	No, ExplainNo Change
8.	Does the person with authority understand the controls, process measurements, and interfaces associated with the Parts Pooling process?	☐ Yes ☐ No, Explain ☐ No Change
9.	Does the responsible person know who has authority to establish and modify the Parts Pooling process?	☐ Yes ☐ No, Explain ☐ No Change
10.	Does the individual with authority know who has the responsibility for the Parts Pooling process?	☐ Yes ☐ No, Explain ☐ No Change

EPI SECTION 2 - MANAGEMENT RESPONSIBILITY & AUTHORITY OBSERVABLES Drop-Down Menu 1. Assignment of responsibility. 2. Assignment of authority. 3. Does not understand procedures, policies or instructions and information. 4. Does not understand controls. 5. Does not understand process measurements. 6. Does not understand interfaces. 7. Span of control.

8. Position vacant.

9. Other.
